

Program Univers

Maxime Spano
Head of the OSI astronomy research program

3 years old program

Astronomy camps in
Switzerland and
expeditions

Observation and scientific measurements

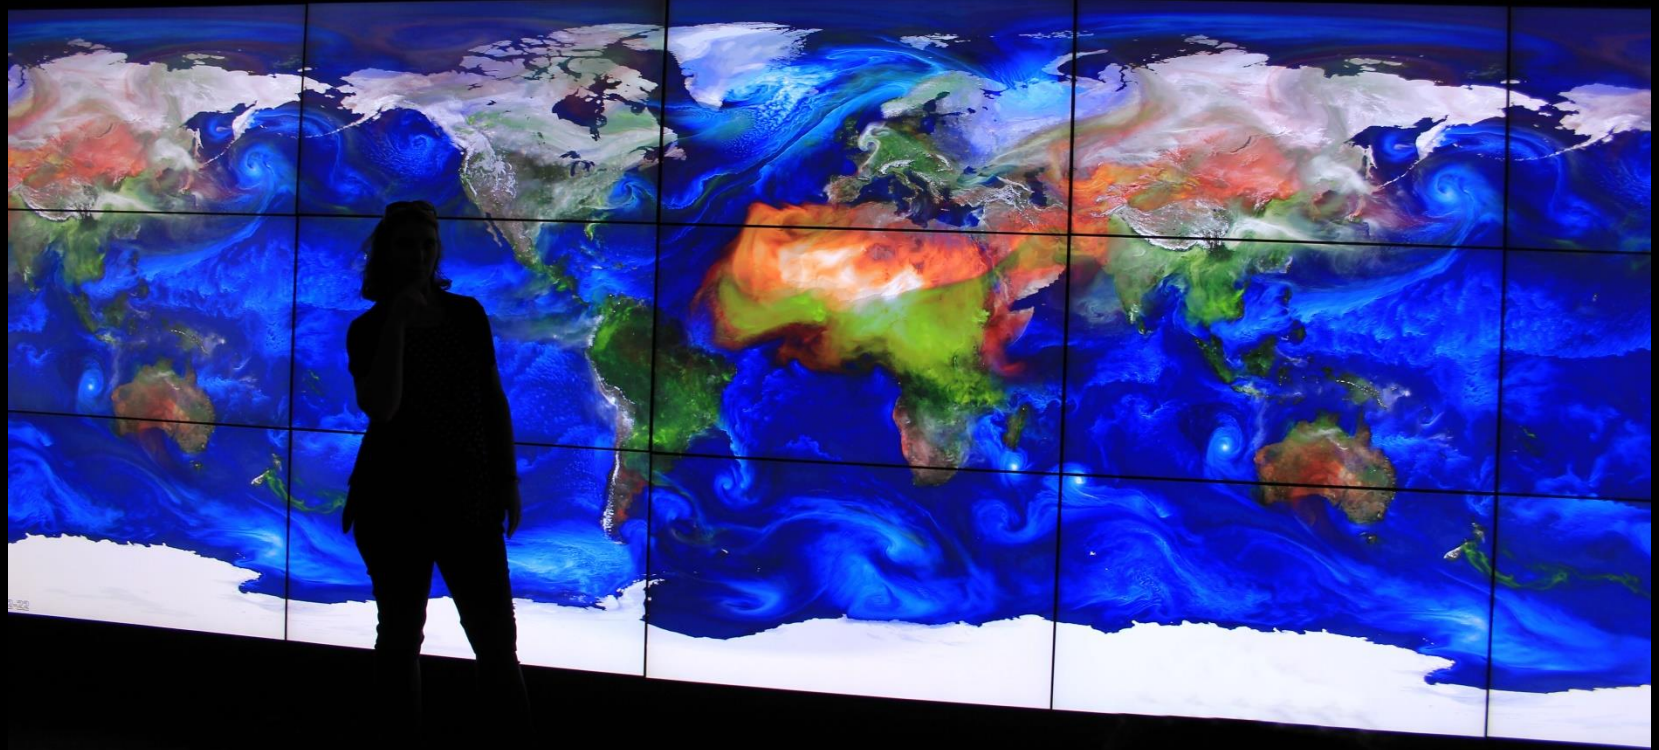

Detection of Near Earth Asteroids
Detection of variable stars
Detection of exoplanets

Team work
Participant empowerment

Excursions to places where exceptional astronomy events happen

Solar eclipse in August 2017

Astronomy, Astrophysics, Aerospace

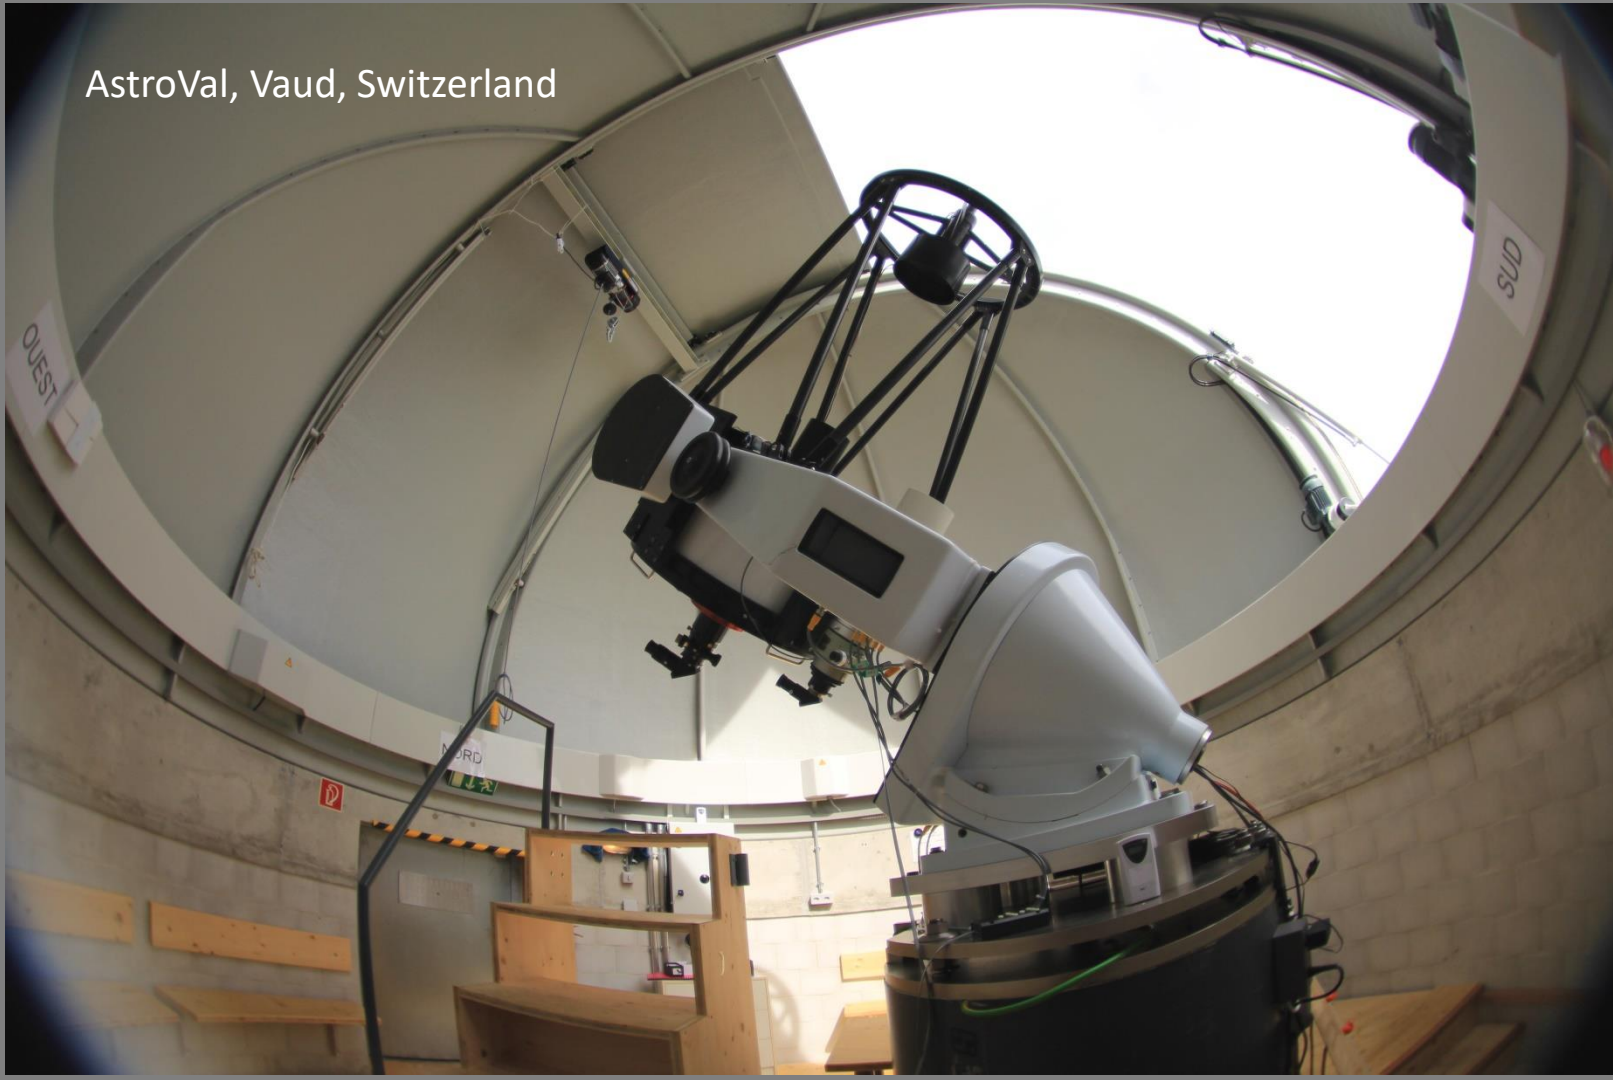

Use of scientific instrument

St-Luc, Valais, Switzerland

AstroVal, Vaud, Switzerland

Discovery of the sky

Digital astrophotography technics

M27, the Dumbbell nebula

The more you know the Universe the more you realise how
fragile is our Planet

M51, the whirlpool galaxy
